- * Lower caliper and higher tensile strength increase tear resistance providing a tough, durable floor paper that better withstands heavy use.
- * Lower porosity decreases the wicking effect found in most floor coverings thus reducing additional clean-up.
- * Superior brightness has directional reflectance at 457nm (TAPPI 452).
- * Excellent flame resistance (T461cm-00), approved by the Physical Properties Committee of TAPPI, improves the safeguarding of persons and property from hazards arising from fire.
- * Save labor, time and money with easy installation and removal; more efficient and cost effective than manually removing overspray deposits and residues from floor surfaces.
- * Vivid bright white paper illuminates booth visibility, reducing rejects by minimizing shadows.
