

What the Pharmaceutical Industry has been asking for...NOW IS HERE!

STATOS

The pharmaceutical industry has been asking for a positive low cost way to identify a gasket that has been put into service. Newman Sanitary Gasket has the solution with the I.D. Tag. The I.D. Tag is made with DuPont™ Tyvek® which is waterproof, heat resistant and is printed with permanent ink that will not run or fade. The I.D. Tag is printed with a part number, batch number, cure date, material compound number, and there is a space for the in-service date.

Benefits of the new ID TAG SYSTEM...

- ideal for maintenance schedules.
- ideal for the pharmaceutical, food, and bio-chemical processing industries.
- each tag is marked with gasket part number and size, material, batch and cure date along with an area for you to indicate the date the gasket is put into service.
- tags are available in five colors for coding to identify the product line, the date of installation and other identifications to your specifications.
- tags are permanently attached to the gasket with a heat resistant (600° F) nylon Tach'em fastener.
- it's low cost, simple and a-sure-fire way to identify the gasket in the fitting. What more could you ask for.

Part Number	Part #: 40RX-E 2"
Batch Number	BN: 2107-19857
Cure Date	CD: 10/09/03
Material	Matl: EPDM
Your In Service Date	Inserv: / /
