FEATURES

- **Stainless Steel Construction** the body and barrel construction contains all 300 series stainless steel internal working parts.
- **Corrosive Applications:** This model is recommended for use on D. I. Water and other corrosive applications where bronze and aluminum are not suitable.
- **Replaceable** heavy-duty rubber cover protects both nozzle and surrounding equipment from dings and scratches.
- **Variable Spray Pattern** adjusts from a soft spray to a solid stream by simply depressing the lever.
- **Conserves water.** Upon release of the lever, the operator is assured of drip-tight shut-off.
- **Heavy-Duty** construction insure an extended life under severe service conditions. The S-151 was designed for harsh environments.
- **Swivel hose adapter.** Allows hose to rotate 360 for easy handling. (Specify hose I.D.)
